ABOUT ME

As a passionate XR Developer specializing in AR, VR, MR experience. I gained a lot of experience in immersive applications, game development and interactive web projects, I love pushing the boundaries of technology to create a delightful user experience .

over the years I've worked on multiple project such as mini games, firebase and strapi integrations, web socket integration, AR projects using XR interaction and vuforia and VR experience with XR plugin and oculus integration. my journey as freelancer, intern, and full time role, where i had the opportunity to lead projects , collaborate with other teams and constantly expand my technical skills

working with different teams has helped me lot on my communication skills helping me seamlessly collaborate with fellow designers, developer and client to get bring the idea live. working on a Effective user experience ,optimizing performance or solving complex development challenges , I always driven to create a innovative solutions I'm always eager to learn and explore new technologies and collaborating with other teams to build a future of immersive technology

EXPERIENCE

Unity XR Developer

DevDen Creative Solutions. jan 2023 - present

- ◆ At DevDen, I've had the opportunity to work on a variety of device-based projects (e.g., Quest, Vive, Vuzix, Pico, HoloLens) and platform-based projects (e.g., Android, iOS, Windows, Web), significantly expanding my expertise in immersive technologies. From designing interactive virtual worlds that fully immerse users in VR to seamlessly interact with virtual objects into the real world using cutting-edge AR technology, every project has been an opportunity to push our creativity and technical boundaries
- ◆ Working on multiple project not only strengthened my technical skills but also exposed me to different aspects of project development 3d ,optimization and interactive designs .

SKILLS

- ◆ Unity XR Development
- ◆ Critical Thinking
- ◆ Leadership

- ◆ Full stack web development
- ◆ Bootstrap web development
- ◆ Java script
- ◆ C - programming Language

LANGUAGE

- ◆ English
- ◆ Tamil

Freelance Unity Developer

Freelance

May 2017 – Jan 2023

- ◆ Working as a freelance Unity developer gave me the freedom to explore different aspects of development, from designing UI to developing own immersive experience in AR, VR, Web technologies .Over the years I worked on multiple mini-games setting up backed services such as Firebase, strapi , etc.. . I also gained hands on experience on AR & VR development in collage leads me into a new sets of adventure
- ◆ Beyond games and XR development, I also took on a graphic design internship and worked on web development projects, which allowed me to gain a broader understanding of technology. that leads me to create simple metaverse projects
- ◆ During my metaverse journey, I've had the opportunity to lead multiple projects and collaborate with some of the brightest minds in the industry. this experience taught me hoe to handle client requirements, plan development cycle.
- ◆ I worked as an inter in several companies which further expanded my industry knowledge and introduced me to structured workflow.

Projects

Metaverse using Fusion

A simple city tour where you can join with your friends, connect voice chat, message all and explore

Metaverse using Pun2

A simple city tour where you can join with your friends, connect voice chat and explore

Multiplayer PC-Web using Pun2

A simple city tour where you can join with your friends, connect voice chat and explore

Hotel Website

Your all-in-one solution for effortless hotel and tour package bookings!

VR lab inspection

learning app that teaches lab equipment handling through interactive VR simulations. It provides a safe, hands-on experience for students

VR Interior painting

Say goodbye to guesswork and hello to confidence in your design choices. Whether you're refreshing a single room or redesigning an entire space, VR Interior Painting brings your vision to life with precision and creativity. See it. Love it. Paint it.

AR Interior Table Visualizer

lets you preview tables in your space using augmented reality, ensuring perfect fit and style before purchase. Enhance your interior design with realistic 3D visualization.
